

Highest performance, lowest prices

# Fall<sup>Plus</sup> offer

for chromatography and spectroscopy  
New momentum for the new year!

## The *ī* makes the difference

From  
299:000 NOK\*

### HPLC Advanced *ī*-Series

- maximum productivity: innovative automation, seamless method transfers and remote monitoring
- best data integrity: a software solution for secure data handling
- more efficiency through intelligence: smart *ī*-functions, analytical intelligence and live monitoring make everyday laboratory work easier

## FTIR-spectrophotometer IRSpirit – including QATR-S ATR

- space-saving: highly sensitive with smallest footprint
- low maintenance: high resistance to humidity, including automatic dehumidifier
- routine: fast and reliable measurement results thanks to specially created macros

## Space wonder

From  
169:000 NOK\*

## UV-1900i double-beam UV-Vis spectrophotometer

- flexible: wide range of functions even without measuring computer due to intuitive touch screen
- efficient: automatic data analysis with pass/fail evaluation\*\*
- ultra-fast: spectra acquisition in shortest time with high scan rate

## Touch & Go

- \* Action valid until December 31<sup>th</sup>, 2023. Excluding VAT and not combinable with other discounts
- \*\* with the included LabSolutions UV-Vis software
